RE: UIM\_ID proposal request

Dear Perry,

During the June 3, 2009 TR-45 plenary meeting, LGE introduced a contribution re-MEID Migration Issues and recently updated [TR-45 090827-02bR1 Update\_Corresp from LGE Re-MEID Migration Issues] regarding ESN reuse for UIMID to help address the urgent need for UIMID resources. During their interim plenary meeting on August 27, TR-45 agreed on the EUMAG recommendation with some further discussion following during the September 2-3 Las Vegas meeting.

The attached recommendations & conclusions [TR-45 090827-02 TR45 recommendation LGE proposal] describe the path forward and exactly what types of phones would be subject to this "ESN re-use" i.e., ESNs used in phones **that can only be provisioned with an R-UIM inserted** can be voluntarily reclaimed **for R-UIM use only**, and re-assigned as UIMIDs to an R-UIM manufacturer accepting the known assignment range conditions.

TR-45 asks CDG to request with urgency your constituents review and consideration, related in particular to recommendation #1 in TR-45 090827-02 and then inform TR-45 if for any reasons this should not be considered, or requires suitable modification. CDG's urgent discussion of this proposal with your operator constituents is critical, given their need to consider any possible back office or roaming issues that may prohibit implementation of the proposal.

Following the CDG response and our other inquiries, if hearing no reasons prohibiting the proposal, TR-45 will notify the industry of the plans. We understand that there will still be a considerable amount of work by carriers & manufacturers including numbering administrators before there may be fruit to bear from these efforts, but we believe it is in the best interest of our CDMA industry.

At this time it seems the published ESN Guidelines *Version 2.0* doesn't require an update. The UIMID guidelines SC.R4004-0 may require an update to include an assumption to the effect that the testing of these targeted resources are the responsibility of the recipient carrier/manufacturer assignee, which we will propose to 3GPP2 if there are no obstacles to moving ahead.

Replies may be directed to Gary Pellegrino, Chair-TR-45 EUMAG and myself. Your immediate actions as well as your continued participation and support are urgently requested. A similar letter, that you are copied on as a courtesy, is also being sent to 3GPP2 TSG Chairs.

Hearing no response by the December 14, 2009 TIA TR-45 meeting, this "ESN re-use" initiative will progress forward.

Sincerely,

Gerard Flynn  
Acting Chair TR-45
