

Fee Structure for Mobile Equipment Identifier (MEID) Manufacturer's ID Code Assignments

TIA MEID Administrator (see below) is the ONLY Global Administrator for MEID Code Assignments

Singlemode Hexadecimal (base 16) MEID

Each singlemode segmented hexadecimal (base 16) MEID Manufacturer's ID Code block assigned is capable of producing 1,048,576 units ["A1" block] or 65,536 units ["A2" block]. It may be used for one or multiple models [without limitation] based on manufacturer and operator requirements.

- The administrative fee for each "A1" singlemode segmented block of 1,048,576 is \$5300 USD.
- The administrative fee for each "A2" singlemode segmented block of 65,536 is \$600 USD.
- The administrative fee for each singlemode test block of 2,048 units [for testing use only] is \$150 USD.

For larger manufacturers, there is also an "A0" singlemode FULL hexadecimal (base 16) MEID Manufacturer's ID Code block assigned capable of producing 16,777,216 units [= 16 x 1,048,576]. It may also be used for one or multiple models based on manufacturer and operator requirements.

- The administrative fee for each "A0" FULL singlemode block [16,777,216] is \$84600 USD.

Multimode Decimal (base 10) MEID

Each multimode IMEI/MEID decimal (base 10) MEID Manufacturer's ID Code block assigned is capable of producing 1,000,000 units for CDMA – GSM – W-CDMA – TD-SCDMA – LTE – 5G use.

From mid-May 2015, the global IMEI database can only accept only one (1) Model Name per block of 1,000,000. Each unique Model Name requires a separate IMEI/MEID Manufacturer's ID Code block to ensure proper global interoperability.

- The administrative fee for each "99" multimode block of 1,000,000 is \$2499 USD.
- The administrative fee for each multimode test block of 2,000 units [for testing use only] is \$150 USD.

Payment Information

Bank wire transfer information is included on the invoice. The amount received by TIA should be exactly the same as TIA invoice amount [net of bank wire fees].

The MEID is considered a global public resource [rather than a commodity or component part]; therefore, TIA does not assess tax in US or add any tax to the MEID invoice.

Wire transfer payment is preferred, but bank card payment can be arranged upon request for a particular circumstance. Please contact TIA MEID Administrator [John Derr - jderr@tiaonline.org +1 202 361 7727; Cathy Wang - ywang@tiaonline.org +86 18818399470] to confirm detail.
